Introduction

Hello, I am a software engineer with a focus on back-end development and database management in the field of web development. I enjoy working on application architecture, designing APIs, and managing data effectively. I also have basic experience on the front-end side and a strong interest in improving myself in that area. I continue to develop skills in aesthetically functional interface designs with a sensitivity to UI/UX. In addition to web development, I have experience in mobile programming and game development. My approach to every project is based on applying clean code principles and ensuring modularity. My goal is to become a productive engineer with technical depth and strong command of modern software development practices, contributing real value to every project.

Work Experience

uyumsoft®

Intern
Full Stack Web Developer
July – August 2024

As part of this internship program, I received accelerated training in C#, Microsoft SQL Server, and ASP.NET technologies. I developed an e-commerce web application using the MVC architecture. Throughout the process, I participated in algorithm exams and had opportunities to exchange technical ideas with other interns.
